### DETAILED ACTION

1. The amendment filed on February 21, 2003 has been entered. Claims 1-24 are pending. Claims 1-12 and 21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 13-20 and 22-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants have removed the modifier "as its main components" in response to the § 112, second paragraph rejection for the indefiniteness of such a term. This amendment (in light of the transitional phrase "comprising") essentially broadens the scope of the claim to allow for the inclusion of any additional components in the claimed coating liquids. However, as applicants point out in their arguments and in the specification, the "coating liquid for forming a transparent coating layer" recited in claim 13 and the "coating liquid for forming a transparent conductive layer" recited in claim 16 are directed towards coating compositions that have specifically limited components. Applicants have

Art Unit: 1773

argued that the coating liquid for forming the transparent coating layer cannot include any "gold-microparticles or gold-containing noble metal microparticles." Furthermore, the production method disclosed by the specification page 21 discloses that the transparent coating layer containing the inorganic binder is coated over the transparent conductive layer containing the gold-containing microparticles, at which point the two components interact. However, the present scope of the claims allows for the coating liquid to include both the gold microparticles and the inorganic binder in the same composition and is therefore not supported by the enabled disclosure.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Marcantonio et al. (U.S. Patent 4,140,834).

Marcantonio et al. discloses a coating composition that comprises an aqueous dispersion containing polyphenylene sulfide, an inorganic binder, and a solid lubricant (abstract). The polyphenylene sulfide is included in an amount 5 to amount 40 weight percent and the inorganic binder is included in an amount of 30 to about 80 weight percent (col. 4, lines 20-55).

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
